

Hydrant Flushing

We will begin flushing fire hydrants on May 13, 2020 starting on the east side of the city and working our way to the west side of the city. In addition to our hydrant flushing we will also be exercising water main valves for several weeks and will be flushing some hydrants during that process as well. Some discolored water may occur during the flushing but the discoloration should clear by running the tap for a few minutes. If discolored water continues for an extended period of time please call the Water Dept. 345-8430 or the Water Treatment Plant 345-2977.
